

SULLAIR CUSTOMER SPOTLIGHT: CURLY'S INC.

By Erica Geske

"If anyone out there is going to have a shop that needs air, a reliable air compressor is the thing to have."

- Curly

Curly's Inc. specializes in the customization of motorcycles and hot rods. Shop services include fabrication, paint, performance/engine work, repairs, stereos and more!

Born into the gearhead family with octane in his blood, shop owner—Curly—leads the team with an intense focus on quality work, treating customers right and making sure riders get what they pay for.

What started as a side project in a home garage has grown into a premiere custom bike and hot rod shop trusted by rappers, pro-athletes and lifelong gearheads across the country. Behind the growth is Curly and a great team truly dedicated to what they do.

With increasing growth of the business, came a new, larger garage space. As Curly was building the current shop in

Burns Harbor, he spotted a Sullair air compressor while picking up materials. Taken by how quiet it was, he knew he had to have a Sullair compressor in the new garage.

The Sullair ShopTek® 1100 with Performance Air System including a refrigerated dryer and filtration is a key piece of equipment at Curly's. Powering cycle lifts, paint booth and tire machine, Sullair air power helps Curly and the team crank out the awesome customizations they're known for.
